Brief Description of Arguments to be Presented:

Claim 12 recites that a control circuit generates a reset signal that is sent to the microprocessor for resetting the program counter of the microprocessor to a predetermined value. The '043 patent teaches in col.6, lines 17-24 that the system returns to normal mode, but does not teach the control circuit reset.

An interview was conducted on the above-identified application on _____.

NOTE: This form should be completed by applicant and submitted to the examiner in advance of the interview (see MPEP § 713.01).

This application will not be delayed from issue because of applicant's failure to submit a written record of this interview. Therefore, applicant is advised to file a statement of the substance of this interview (37 CFR 1.133(b)) as soon as possible.
